

TAB STORAGE SYSTEMS

MODULAR MOBILE

High-Value Storage System

If your organization is searching for a cost-effective way to put more files in less space, TAB's Modular Mobile system is the answer. The Modular Mobile system can double the amount of useful space in your storage area by putting filed materials on wheels. Less effort is required to open and close mobile units, making them ideal for heavy materials. Additionally, a mechanical-assist drive system is available for additional ease of movement.

Easily Installed

TAB's Modular Mobile system can be installed directly on any carpeted or hard-floor surface. The modular design makes the system easy to expand and easy to relocate. Carriages are built and sized to order, to meet your full range of shelving requirements.

Sturdy and Long Lasting

Modular Mobile carriages are fully welded instead of bolted, providing durability and eliminating binding and racking. For easy maintenance and adjustment, built-in track leveling bolts allow the system to be leveled at any time, even after it is fully loaded. The track splice design keeps the rails in alignment and prevents rail separation.

Safety

Anti-tip devices are standard on all TAB lateral units and optional for compacting units. The chain drive on a compacting mechanical system is enclosed for safety. Additionally, TAB's Modular Mobile track is fully ADA compliant.

Features

Economical mobile storage

Relocate easily as your storage needs change

Level the system without removing shelving and stored material

Expand the system seamlessly as you grow

Utilize your existing shelving

TAB STORAGE SYSTEMS

Enhance Your Office Environment

TAB Modular Mobile systems offer a complete spectrum of design possibilities including color and texture choices to create visual harmony in any environment. Optional end panels are available in painted steel, fabric or laminated with self-edged or radius treatments.

Specifications

- System Height – Modular Mobile track and carriage adds 4" to overall shelving height
- Weight Load – Modular Mobile carriages will bear up to 700 lbs. per linear foot

System Components

- Standard track assembly
- Anti-tip assembly (standard for lateral systems, optional for compacting systems)
- Movable carriages
- Rail stops and end caps

Shelving

Use your existing shelving or select from TAB's extensive line of shelving and cabinets.

About TAB

As a recognized leader in the records and information management industry, we develop custom solutions that enable our customers to control, store and access critical information. We offer top quality filing systems, media storage equipment and specialists that solve complex records and information management challenges. With more than 50 years of experience, we serve customers in a variety of industries including legal, finance, healthcare, insurance, manufacturing, education and government.
